

# The Hard Way

S-X

Running lost inside the cycle with you  
Had to let go it was long overdue  
Now I'm far from the person that you once knew  
I had to learn things the hard way  
Dodging everything that's not meant for me  
Gave out my time love trust and energy  
All that's left of me for you is memories  
Don't need no more problems nah nah

Most of those problems were solvable  
But you made em feel like an obstacle  
Just moving like shit was impossible  
Life will go on but just not with you  
Still you stay in my head like a follicle  
Taking everything back that I promised you  
Better days are loading soon  
It drained me to get over get over you  
Crazy shit I was goin through  
We just couldn't get nothing right  
You gave me life  
Then cut the lights  
It's crazy how you love to fight

No more running lost inside the cycle with you  
Had to let go it was long overdue  
Now I'm far from the person that you once knew  
I had to learn things the hard way  
Dodging everything that's not meant for me  
Gave out my time love trust and energy  
All that's left of me for you is memories  
Don't need no more problems nah nah

Most of these problems  
They ain't really problems  
We had a moment  
But you left me frozen  
Can't give that energy back out to no one

And though you and I are a thing of the past  
All the roads lead to we wouldn't last  
You're looking for someone like me  
But there's no one

No more running lost inside the cycle with you  
Had to let go it was long overdue  
Now I'm far from the person that you once knew  
I had to learn things the hard way  
Dodging everything that's not meant for me  
Gave out my time love trust and energy  
All that's left of me for you is memories  
Don't need no more problems nah nah
