The One

S-X

The cold on your lips, it makes me shiver
I just want to get inside your head
You look up at me and say you love me
But by now I know how to feel

Now I know all I wanted was you one day
Then I found out who you are
I'm so glad that you let me make that choice
Because now we've come so far

Baby, I know you are the one
You can light up my life just like the sun
I take it so gentle, with you
I promise to give you all my life

The time that we spent don't feel so wasted
I'm so grateful for the memories
I know we may get through complications
And I don't care whoever sees

I'm gonna spend the rest of my days with you
Nothing can tear us apart
I'm so glad that you let me make that choice
Because now we've come so far

Baby, I know you are the one
You can light up my life just like the sun
I take it so gentle, with you
I promise to give you all my life
