

Through the Years

S3RL

"Hello? Is, is anybody there? I'm so lonely..."

Through the years and far away
Far beyond the milky way
See the shine that never blinks
The shine that never fades

Through the years and far away
Far beyond the milky way
See the shine that never blinks
The shine that never fades

Hello little star
Are you doing fine?
I'm lonely as
Everything in birth

If I could fly
across this night
faster than the speed of light
I would spread these wings of mine

Through the years and far away
Far beyond the milky way
See the shine that never blinks
The shine that never fades

"You have no messages"
