

Every Christmas Day

Saara Aalto

When the nights get long
I remember how we used to sing that song
Feels like a world away
Then a shooting star tells me where you are and how you doing,
babe
And a melody makes it feel like you're not so far away

Say that you feel me
Say that you'll always remember
Say that you're with me
Come to me every December
I don't feel so alone tonight
Cause I see you under Christmas lights
Say that you feel me
Say that you'll always remember
Every Christmas day
Every Christmas day

When a snowflake falls oh I know you're getting close
And it won't be long oh I just want you here again
And a shooting star tells me where you are and how you doing, b
abe
And a melody makes it feel like you're not so far away

Say that you feel me
Say that you'll always remember
Say that you're with me
Come to me every December
I don't feel so alone tonight
Cause I see you under Christmas lights
Say that you feel me
Say that you'll always remember
Every Christmas day
Every Christmas day

And a shooting star tells me where you are and how you doing, b
abe
So say that you hear me
Come to me every December

Say that you feel me
Say that you'll always remember
Say that you're with me
Come to me every December
Every Christmas day
Every Christmas day
Every Christmas day
