

# I Can't Sleep Anyway

Sad Harmony

Comprehension of this life  
So useless seems to me  
Like a bad dream  
You're not speaking to me  
Dawn's coming suddenly

Once she took me by hand  
Gently caress my shoulder  
But everything is passing away  
I get near carefully  
But we shall never see one another again  
We are sick of being together  
Oh, we are not on the same shore  
It's how it had to be

When reality would be  
Different so completely  
So different, it appears  
I'm not that cruel, face to face no more  
And no more lying if i shall recall

You came so close, so near  
I felt taken to heaven for a while  
Forsaken for now & ever  
What an absurd thought to me  
But we shall never....

Don't make a mention of this  
Slow sinking down  
I don't know who we are  
It have to be  
Over me  
Unclean

Nature is the temple with alive colonnade  
Tangle of silent voices ring here now and then  
People are walking in this symbolic forest  
Which is wary watching them

There are fresh smells gone away  
Just like red cheek of a child  
With the sweet oboe with freshness of the grass  
Why dearest shall pass

As the echoes fuse into deep dark unity  
So the colours, parfumes, will be the same for ever  
High above the trees, high above the lakes  
Flow my spirit, fly away

Somewhere in me I found true passion finally.  
Drug is sneaking around me  
Nothing change its vanity
