

## On My Left Side

Sad Harmony

So tired i came in  
Into lands of my dreams  
Intact silence she gave me  
To be my guide

Day by day fade away  
Only days with you shall  
Outlast forever  
When i'll be your most secret tear  
Don't let me fall down  
We're supposed to never say goodbye

We'd better get every dream away  
We walk on down  
We shouldn't even sleep, shadow haunts the night

Long way of passion  
We came to your utmost shore  
The taste of your young blood  
I still feel in my frozen mouth  
We can't play all the way  
Not even human being shall  
Outlast forever...

Which way to get up the stream  
Which way to find you, when you can't  
Find yourself, it's up to you
