

I Miss My Friend

Sadie Jean

I miss my friend
The group is going out, I'm staying in
'Cause if I hear you laugh, don't think I'll live
And I don't wanna fall apart again
But damn, I really, really miss my friend

I wanna put back on our show, sleep on the couch
Then wake up when I hear you walking out
We never should've slept in the same bed
'Cause damn, I really, really miss my friend

The person that you made me think you'd be
He'd never hurt someone how you hurt me
And I know he's not real, it's in my head
But I still really, really miss my friend

And I wish I never saw this working out
Wish I'd never let you see me cry
But you took a couple years to wear me down
Now you got me, now you gotta change your mind

But you said it's for the best
Hey, at least we tried, I guess
And even after all of it, I don't love you any less
But I miss my friend

And so I'll keep getting used to the way things are
And maybe I'll be fine with time apart
It's okay, I'll see you now and then
But damn, I really, really miss my friend
