

# Roaches

**Sadistik**

Turn a blunt into a roach in a hundred feet of snow  
Turn a blunt into a roach in a hundred feet of snow

They testify that the dead can rise  
Pests and flies get the pesticides  
I'm pessimistic pestilent since  
The lightning bugs went electrified  
Tried to run like insects in light  
A nest that's tired unless it's tied to the  
Hive mentality my finale seems dire  
Why are we fine with the agony?  
(And I know) I'm not storm chasing with wrong sails  
(And I know) I got short patience for tall-tales  
Ah hell it never rains, it's all hail  
That's heavy rain on everything no heaven reigns yet all hail

It's a nuclear winter  
(The roaches all around me, roaches all around)  
It's a nuclear winter  
(The roaches all around me, roaches all around)  
It's a nuclear winter  
(The roaches all around me, roaches all around)  
It's a nuclear winter  
(The roaches all around me, roaches all around)

I see fantasies of my own demise  
Ants and fleas in my lonely nights

Maggots in my haggard skin  
Mantises in Cody's eyes  
In passages I co-designed  
Abdomen, thorax and head  
Stab 'em with a tack or pin  
Then resurrect me like Lazarus  
Watch the locusts sink in my heart  
Cockroaches think that they're gods  
But the insects don't impress  
I dissect their midsect  
I find death in the sterile things  
Bury me in kerosene  
Get soaked in blood like a Carrie scene  
Now open up for those roaches

It's a nuclear winter  
(The roaches all around me, roaches all around)  
It's a nuclear winter  
(The roaches all around me, roaches all around)  
It's a nuclear winter  
(The roaches all around me, roaches all around)  
It's a nuclear winter  
(The roaches all around me, roaches all around)

??The world like you never know, until it approaches and now you begin to understand. There is something worse, there is something that hell itself is going to be cast into. There is that final judgement, those are hanged at the cross, those hailed in the nails.??
