

You never have to be alone  
You never have to worry  
You're always gonna have a home  
Right here with me  
When you're lost in your doubt  
And your fears get loud  
And you don't know where to go  
Just look to your heart  
I'll be your North Star

Follow your compass down to me  
I'm sitting on this rock just waiting  
Follow your compass down to me  
I'll be here, I'll be here  
Follow your compass down to me  
I'm sitting on this rock just waiting  
I'm waiting, you'll find it  
Just follow your compass

Just follow your compass  
Just follow your compass

You never have to be alone  
You never have to worry  
You're always gonna have a home  
Right here with me  
Laugh more, fear less  
Love, hope, happiness  
Let 'em drive your heart  
I'll be your North Star

Follow your compass down to me  
I'm sitting on this rock just waiting  
Follow your compass down to me  
I'll be here, I'll be here  
Follow your compass down to me  
I'm sitting on this rock just waiting  
I'm waiting, you'll find it  
Just follow your compass

Just follow your compass  
Just follow your compass

I'll be here for you when the west wind blows you down  
When the east coast light shines so bright you cannot see your way  
When it all goes south, do you find yourself just running home?  
Just look to your heart  
I'll be your north

Follow your compass down to me  
I'm sitting on this rock just waiting  
Follow your compass down to me  
I'll be here, I'll be here  
Follow your compass down to me  
I'm sitting on this rock just waiting  
I'm waiting, you'll find it  
Just follow your compass

Just follow your compass  
Just follow your compass
