

Think About It

SAFIA

I know you're crumbling in
I'm stumbling in the water
I know the way to begin
With everything out of order

I can feel this
There isn't a way around it (there isn't a way around it)
And when I can feel this
You know that I think about it

I know, been digging a hole
Been digging a little faster
I know, the tighter you hold
The further a thing you're after

I can feel this
There isn't a way around it (there isn't a way around it)
And when I can feel this
You know that I think about it

And when I can feel my love
And when I can feel my love

I know it's a hell of a thing to harbour
But I know the colour of [?]

I can feel this
There isn't a way around it (there isn't a way around it)
And when I can feel this
You know that I think about it (you know that I think about it)

You know that I think about it
You know that I think about it
