

Ellery
Are you with us?
We could use
Someone a little like you
You will be
Just what we're missin'
You can't see
Farther than tomorrow
I'll give you whatever you want
To see where you're goin'
I'll give you whatever you want
The seed that I'm sowing
No matter where you are
Just listen with your heart
Forever and a day
It's not far away
Talk to me
I will listen
You can see
That I'm thinkin' 'bout you
I can read
What you're thinkin'
This is me
'n I won't ever harm you
I'll give you whatever you want
The secret you're holdin'
I'll give you whatever you want
To see where I'm going
No matter where you are
Just listen with your heart
Forever and a day
It's not that far away
Although we're world's apart
Were with me from the start
I know you know my name
It's time to start again
time to start again...
time to start again...
I'll give you whatever you want
To see where you're going
I'll give you whatever you want
The seed that is growing
No matter where you are
Just listen with your heart
Forever and a day
It's not that far away
Although we're world's apart
Were with me from the start
I know you know my name
It's time to start again
No matter where you are
Just listen with your heard
Forever and a day
It's not that far away
