

## Romance

Sailor

Romance, romance, romance  
You keep me dancing all night long  
You like to lead me on  
The chimes of midnight will fade away  
And I know that nobody else is going to matter until it's day  
So let the 'boys night out on the town'  
Carry on without me  
I know a place I'd rather be

To look at you is just another way to look at romance  
To be with you is to fill my world full of romance  
Nobody else could be closer to me  
But that's the way that lovers ought to be  
Just you and I together making romance  
Romance (Romance)

You keep me dreaming all day long  
You've got me holding on  
To every moment that came our way  
For I know that I'm gonna need you by night and day

To look at you is just another way to look at romance  
To be with you is to fill my world full of romance  
Nobody else could be closer to me  
But that's the way that lovers ought to be  
Just you and I together making romance  
Nobody else could be closer to me  
But that's the way that lovers ought to be  
Just you and I together making romance  
Romance  
Just you and I together making romance  
Just you and I together making romance  
Just you and I together making romance  
...
