

When It Hurts You

Sailor

I don't sleep much, I don't go out
I don't find much to smile about
Instead I'm thinking, night and day
Of how to make you look my way

I see you talking to the other guys
I bet they'll give you the same old lies
For you're more than a girl to me
You're my daydream fantasy

Won't you tell me what to do about love
Won't you tell me what to do about love
Won't you tell me what you do about love
When it hurts you?

I'm not the neighbourhood Romeo
I guess for that I've got far to go
But I'm in pieces over you
Won't someone tell me what to do?

I've heard that love is the sweetest thing
It's supposed to make you just want to sing
But I know different so tell me why
It only makes me want to cry

Won't you tell me what to do about love
Won't you tell me what to do about love
Won't you tell me what you do about love
When it hurts you?

I'm in pieces over you
Won't someone tell me what to do?
I know different so tell me why
It only makes me want to cry

Won't you tell me what to do about love
Won't you tell me what to do about love
Won't you tell me what you do about love
When it hurts you?
When it hurts you

Won't you tell me what to do about love
Won't you tell me what to do about love
Won't you tell me what you do about love
When it hurts you?
When it hurts you
When it hurts you
When it hurts you
