

## Sirens

Saint Asonia

We all fall down together  
Nothing lasts forever  
This is not the end  
Are you listening

Have we been poisoned from the inside  
'Cause we're still burning at the ends  
Have we been standing on an empire  
When every floor is made of sand

We all fall down together  
Nothing lasts forever  
This is not the end  
Are you listening  
We're all in this together  
But nothing lasts forever  
This is not the end  
Are you listening to the sirens?

Do you still see it in the distance  
Can you still read the warning signs  
Do you believe in our existence  
'Cause I believe in us tonight

We all fall down together  
Nothing lasts forever  
This is not the end  
Are you listening  
We're all in this together  
But nothing lasts forever  
This is not the end  
Are you listening to the sirens?

Another brick in the wall  
We were born to resist it if it falls  
Come with me, we will rise  
Can I believe it tonight?
