

Constantly

Saint Etienne

All day I'm walking in a dream
I think about you constantly
Just like an overflowing stream
Your memory haunts me constantly

Shadows fall and I try to drive you from my mind
So you're no longer near to me
But my heart sees you there with me
Every sunset you share with me

The rain that patters through the trees
Reminds me of you constantly
Your name is whispered by the breeze
And lovebirds bring your song to me

Just as sure as the stars keep burning in the sky
Your love will stay a flame in me
A flame that burns so bright
Not only through the night but constantly

The stars keep burning in the sky
Your love will stay a flame in me
A flame that burns so bright
Not only through the night but constantly

Though we may be far apart
You're constantly deep in my heart
