

Through The Winter

Saint Etienne

You see me waiting by the book store
Standing in the snow
I knew your smile was what I needed
I hope I told you so
I knew my timing could be better
But that's the way it goes
But I believe in you and me
And we can make it through the winter

The trees out there outside my window
Are frosting on the pane
I'm hoping you and me go
So you'll be back again
I need a hand to wrap the presents
So get on board that train
'Cause I believe in you and me
And we can make it through the winter

We can make it through the winter
We can make it through the winter
