

What Kind of World

Saint Etienne

What kind of fool do you take me for?
Telling people there could be more
Then say, no way

This is our story, let's get it right
This is our home, but I don't feel at home tonight
Not tonight

What kind of world is it
We're living in
What kind of world is this
I feel like packing it all in
Let's find another country
Mirror the sun
Let's find another country
A better one

What kind of world is it
We're living in
What kind of world is this
I feel like packing it all in
Let's find another country
Mirror the sun
Let's find another country
A better one

What more can I do, it drives me mad
Each conversation I seem to have ends fast
Miles away

Let's go somewhere off the beaten track
And if we don't feel like going back, never mind
No, never mind

What kind of world is it
We're living in
What kind of world is this
I feel like packing it all in
Let's find another country
Mirror the sun
Let's find another country
A better one

What kind of world is it
We're living in
What kind of world is this
I feel like packing it all in
Let's find another country
Mirror the sun
Let's find another country
A better one
