

A Bluer Blue

Saint Motel

Take a look
Through the same hardcover book
But the words hit different then
I was much younger and covered in dread

The human condition is so hard to treat
From the moment you're born 'til the moment you cease
It's a crowning achievement, they were even breathing
Blow us a kiss before you fade away
And take a look again
What do you see my friend?
The sky is bigger than I've ever seen

Bluer than blue

Take a drive
The loudest way to clear my mind
But the streets look different now
I was an angel chained to the ground

The human condition is so hard to treat
From the moment you're born 'til the moment you cease
It's a crowning achievement, they were even breathing
Blow us a kiss before you fade away
And take a look again
What do you see my friend?
The sky is bigger than I've ever seen

The sky is bigger than I've ever seen
I can't fly way away from me
It's like nothing, but, it's everything
The sky is bigger than I've ever seen

Bluer than blue

Aah
