

Make Me Feel Like

Saint Motel

It started out like it always ends
Shaking in front of a sunrise, yeah
You had other plans
You had other mans
Dipping your shake with the french fries, yeah

There's only so much that my heart can take
I get so close and then I hesitate
I don't wanna die alone

I want somebody make me feel like
I want somebody make me feel like (Woo)
I want somebody make me feel like (Woo)
Ooh, could it be you tonight?
I want somebody make me feel like (Woo)
I want somebody make me feel like (Woo)
Ooh, could you be the one to make me feel like?

(Don't) Don't let me down
(Let) Give the run around (Me)
Yeah, you'll be my ticket to heaven, mm (Down)

There's only so much my heart can take
I get so close and then I hesitate
I don't wanna die alone

I want somebody make me feel like
I want somebody make me feel like (Woo)
I want somebody make me feel like (Woo)
Ooh, could it be you tonight?
I want somebody make me feel like (Woo)
I want somebody make me feel like (Woo)
Ooh, could you be the one that makes me feel like?

Ooh, hey
Ooh (Feel like)
Ooh, hey
Could you be, could you be the one to make me feel like?
(Could you be the one that makes me feel like that? Hey)
(Could you be the one that makes me feel like that?)
(Feel like)
Hey
Could you be, would you be, should you be here with me?
And would it kill us for once to get something so right?
That goes on and on and on and on and on
And it sounds like
Feel like

I want somebody make me feel like (Woo)
I want somebody make me feel like (Woo)
Ooh, could it be you tonight?
I want somebody make me feel like (Woo)
I want somebody make me feel like (Woo)
Ooh, could you be the one that makes me feel like?

(Could you be the one that makes me feel like that? Hey)
(Could you be the one that makes me feel like that?)

(Feel like)

Hey

Could you be, could you be the one to make me feel like?

(Could you be the one that makes me feel like that? Hey)

(Could you be the one that makes me feel like that?)

(Feel like)

Could you be the one that make me feel like?
