Friends

SAINT PHNX

When the day breaks your heart
And there's shouting in your head
We know we can drown it out
Drinking with our friends
Raise your glass to the past
Raise your bottles to regret
Always there to pick me up
Here's to all my friends (yeah)

Give me a chance to set the scene
We were lost and underrated
Graduated on the streets
Back then our lives were so complete
Empty bottles, empty pockets
And a joker up our sleeve

There were nights that we'll never remember
There were days that we won't forget
There's a song that we sing with a laugh and a drink
And we know that it goes like this

When the day breaks your heart
And there's shouting in your head
We know we can drown it out
Drinking with our friends
Raise your glass to the past
Raise your bottles to regret
Always there to pick me up
Here's to all my friends (yeah)

These days the time just slips away
And it gets hard to face your worries
When you're trying to escape
We still go back to the same place
When we started, never parted
Since we went our separate ways

There were nights that we'll never remember
There were days that we won't forget
There's a song that we sing with a laugh and a drink
And we know that it goes like this

When the day breaks your heart
And there's shouting in your head
We know we can drown it out
Drinking with our friends
Raise your glass to the past
Raise your bottles to regret
Always there to pick me up
Here's to all my friends (yeah)

There were nights that we'll never remember
There were days that we won't forget
There's a song that we sing with a laugh and a drink
And we know that it goes like this

When the day breaks your heart

And there's shouting in your head
We know we can drown it out
Drinking with our friends
Raise your glass to the past
Raise your bottles to regret
Always there to pick me up
Here's to all my friends (yeah)

Always there to pick me up
Here's to all my friends (yeah)
