

# Make Us Dream

SAINT PHNX

Underneath the Glasgow lights  
The narrow streets are blue and white  
They lead me to a place where I belong  
And walking there I hear a sound  
Of all the people loud and proud  
Their voices come together in a song

No matter what may come  
We'll always follow on  
We'll always follow on  
We've had our darkest days  
Now is our time again  
The writing's on the wall

Now you've got giants at your feet  
You'll hear the call of history  
You gave us something to believe  
We follow you, so make us dream

Now make us dream  
Now make us dream

We will travel far and wide  
To fly the flag and fly it high  
For all the ones we've lost along the way  
To absent friends we'll raise a glass  
And everything that's come to pass  
Has paved the road to lead us to this day

No matter what may come  
We'll always follow on  
We'll always follow on  
We've had our darkest days  
Now is our time again  
The writing's on the wall

Now you've got giants at your feet  
You'll hear the call of history  
You gave us something to believe  
We follow you, so make us dream

Now make us dream  
Now make us dream

Now make us dream
