

Up To The Stars

SAINT PHNX

So I'll make my way up to the stars
I will find you wherever you are
And if you're alone in the dark
Light will guide me
And I'll find my way back to you

I'm feeling lost
Cold and alone
Reach out my hand for someone to hold
My heart is heavy
Pulling me down
The weight on my chest
Since you're not around
It seems like the days are passing like years
Ticks of the clock
A thousand between as I try to accept
It still feels so wrong
I just can't believe that you're gone

So I'll make my way up to the stars
I will find you wherever you are
And if you're alone in the dark
Light will guide me
And I'll find my way back to you

Try to remember
But you're not around
Listening the voicemails
I hear how you sound
Falling to pieces
Back to the start
Put me together
When I fall apart
It seems like the days are passing like years
Ticks of the clock
A thousand between as I try to make sense
Try to move on
I just can't believe you're gone

So I'll make my way up to the stars
I will find you wherever you are
And if you're alone in the dark
Light will guide me
And I'll find my way back to you

I'll make my way up to the stars
I'll make my way up to the stars

Breathe out
Breathe in
I won't stop believing
That I'll see your face in the crowd

Breathe out
Breathe in
A feeling of come back around

So I'll make my way up to the stars
I will find you wherever you are
And if you're alone in the dark
Light will guide me
And I'll find my way back
I'll make my way up to the stars
I will find you wherever you are
And if you're alone in the dark
Light will guide me
And I'll find my way back to you

I'll make my way up to the stars
