

Solid Gold

Saint Raymond

I don't really care what your friends say
I just wanna know where you go
Just give me your hand we could slip away
When we get reckless time goes slow

Even in the dark I see you glowing
But the light leaves all of our flaws showing
A new day brings us back to earth
And like hell it hurts
But we keep on going, yeah, we keep on going

There's a fire in our hearts we may never know
That we could turn a spark in to solid gold, solid gold
Never gonna find someone who makes me feel the way that you do
There's a fire in our hearts we could make it glow, solid gold

I've been feeling lost feeling out of place
Cos we've been meeting eyes in a different way
And you know I'm not one to embrace change
But when you feel hopeless I know you'll come back again

A new day brings us back to earth
And like hell it hurts
But we keep on going, yeah, we keep on going

There's a fire in our hearts we may never know
That we could turn a spark in to solid gold, solid gold
Never gonna find someone who makes me feel the way that you do
There's a fire in our hearts we could make it glow, solid gold,
solid gold

There's a fire in our hearts we may never know
We could turn a spark in to solid gold

There's a fire in our hearts we may never know
That we could turn a spark in to solid gold, solid gold
Never gonna find someone who makes me feel the way that you do
There's a fire in our hearts we could make it glow, solid gold
