## **White Stallions**

Yesterday I saw my face pictured in the sky as I gazed upon myself my whole life flashed by I heard the sound of hoofbeats from a thousand angry mares before I could control my thoughts my inner soul was theirs

White stallions in my vein white stallions lord stop me before I go insane

Took me to the promised land where everything is free looked around and saw my friends laughing loud at me a great stone wall divided us on their side was a dance on my side was endless torture guess I blew my chance

Only time can ease the pain the stallions left behind tiny hoofprints on my arm strung out in a line wish that I could start again and change my evil ways trapped upon the stallion's back 'till my dying days **Saint Vitus**
