

Demon Pill

Saint

I think about the tragic day you came to me
A love so wrong you set me free
The nightmare had its day
See you a different way
Your so-called love was jus a poison after all
But in the end I know it's you who'll take the fall
The wounds are healing now
But I don't know how

The devil drank with me, was blind but now I see
The devil drank with me, one taste is all you'll need

The ride was winding down, the pain was all too real
I took the demon pill to heal
The nightmare had its way
And now it's here to stay

The devil drank with me, was blind but now I see
The devil drank with me, one taste is all you'll need
The devil drank with me, his grip was tightening
You tried to steal my soul but now I'm demon free

(You've taking everything and left me on my knees
So if you poison me, I'll bite the hand that feeds)

The devil drank with me, was blind but now I see
The devil drank with me, one taste is all you'll need
The devil drank with me, his grip was tightening
You tried to steal my soul but now I'm demon free
