

# Desperate Night

Saint

Long ago I heard the story  
Of the day that waits in time  
Untold souls on earth were left behind  
Like a thief at night in the shadows wake  
There was a sound, a flash in the night

Two gone before me  
The terror starts today  
Desperate, desperate night (x2)

All alone where memories haunt me  
In this day and trapped in time  
Reaching for a truth that wasn't mine  
Desperate for a light to shine my way  
Then a sound, a flash in the night

Who stood before me?  
The devil has his day

Desperate, desperate night (x4)
