Mention NFTs one more time  
And it's guaranteed we're Not Fucking Tonight  
You got OpenSea on your mind  
When it should be me that you prioritize  
Tryna get through but it don't compute  
'Cause you're busy aiming for the moon  
You think I'm enthused  
But I got some news for you

I don't care about your crypto, boy  
Not at all, not even one bitcoin  
CEO of being unemployed  
I got nothing left to give, no  
To another crypto boy  
So unaware I'm even there  
I tried to care about you  
But there's no point  
You're too in love with all your crypto, boy

Think you run the world from your room  
Bet you'd trade me in for a token or two  
When the bull run ends and it all goes red  
Tell me, what will you do?

I don't care about your crypto, boy  
Not at all, not even one bitcoin  
CEO of being unemployed  
I got nothing left to give, no  
To another crypto boy  
So unaware I'm even there  
I tried to care about you  
But there's no point  
You're too in love with all your crypto, boy

Tryna get through but it don't compute  
'Cause you're busy aiming for the moon  
You think I'm enthused
