

# Die Before You Fly

Saliva

Standing on the edge of a dying breath  
I gave you everything I could, now there's nothing left  
Staring at a mask and the blackened eyes  
Trying to find a part of me that I recognize  
I hate who I am with you, I've  
Got to do what I  
Have to do

Lose you to find me

You've gotta crawl before you walk  
Before you run, before it ends  
Gotta fall and lose it all to start again  
Fight until you feel  
Bleed before you heal  
You've got to  
Kiss the ground and touch the sky  
Die before you fly

Carrying the bones, everything I know  
Is in the past, in the black, in the cloud of smoke  
Killing all days, all the time I wasted  
Suffocating on a million ways to choke and  
You can't breathe and  
I can't breathe now, I'm  
Breaking free, sick of  
Your disease

You've gotta crawl before you walk  
Before you run, before it ends  
Gotta fall and lose it all to start again  
Fight until you feel  
Bleed before you heal  
You've got to  
Kiss the ground and touch the sky  
Die before you fly  
Die before you fly

So long to every toxic memory  
I'm gone  
I'll learn to rest in peace

You've gotta crawl before you walk  
Before you run, before it ends  
Gotta fall and lose it all to start again  
Fight until you feel  
Bleed before you heal  
You've got to  
Kiss the ground and touch the sky  
Die before you fly  
Die before you fly  
Die before you
