

best friend on the cross

salvia palth

Best friend on the cross
You can love them if you want
But the first thing that you saw
Should have told you what was what

Driving on the frost
Couldn't help but to get lost
While the ice keeps getting soft
Before long we'll have to stop

If I had the guts
I would tell you what was what
Can't think about what you've done
Til there's no ice under the sun

I'll always give a fuck
But now that you're down on luck
Don't know how to do it all again
Keep it right til the end

If I had the guts
I would tell you what was what
Can't think about what you've done til there's no ice under the sun

Can't think about what you've done til there's no ice under the sun

Can't think about what you've done til there's no ice under the sun

Best friend on the cross
You can love them if you want
But the first thing that you saw
Should have told you what was what

Driving on the frost
Couldn't help but to get lost
While the ice keeps getting soft
As the sun is held aloft

If I had the guts
I would tell you what was what
Can't think about what you've done
Til there's no ice under the sun

I'll always give a fuck
Even if that you're down on luck
Don't know how to do it all again
Can be hard just to be your friend

I won't stand in your way no matter how it feels
Don't know what to say
That's my Achilles heel
Out in the rain
Finally felt so real
All work and no play
That's my Achilles heel
