

Blood Run Cold

Sam Brown

It makes my blood run cold
It makes my blood run cold
It makes my blood run cold
It makes my blood run cold

To see how cheerful you can be, when you work in a laboratory
Researching chemical warfare, that perpetuates a nations disease
You'll defend a murderer, who's raped abused and killed
You'll uphold their innocence, all of your own fee will

It makes my blood run cold
It makes my blood run cold
It makes my blood run cold
It makes my blood run cold

That while you make the tea, the war is on the television
You child of three's intrigued, and all you say is can't I have
some peace
We watch the demise of the earth, and I know that I am guilty
I commit the crime of birth, and watch with glazed expression
As we desecrate our world

It makes my blood run cold
It makes my blood run cold
It makes my blood run cold
It makes my blood run cold

One day there'll be no one to hear the screaming
All around you people still no one hears the screaming

It makes my blood run cold
It makes my blood run cold
It makes my blood run cold
It makes my blood run cold

Cold
Cold
Cold
Cold
