Valentine Moon

Sam Brown

The first time you kissed me at the end of our street The gas lamps shone above us, young lovers we'd meet But the old town has gone now and it's winter too soon Still we waltz beneath our valentine moon

The streets and the market and the old dog and bell We've gone through the changes, we've lived our lives well

But the old town is gone now and it's winter too soon Still we waltz beneath our valentine moon

Valentine moon, valentine moon
We danced together as old lovers do
Valentine moon, valentine moon
We'll always remember our valentine moon

Cette fois que tu m'embrasse, au bout de notre rue Les lampes de gaz nous allumiere, toi et moi jeunes amants

But the old town is gone now and it's winter too soon Still we waltz beneath our valentine moon
