

# Start Again

Sam Fender

Let's start again  
An embryonic world, all the books are burned  
We have to relearn everything  
New religions, same old science  
'Cause the tests came back the same  
Start again  
A brand new globe, untouched and beautiful  
So we can burn it all, burn it all again  
New dictators with funny facial hair  
We follow them anywhere, just like we did before

Let's start again  
Before time is running down

Let's start again  
Let's start again  
Let's start a..

Let's start again  
Forget the atom bomb, watch us invent it all again  
'Cause everybody's looking for efficient ways to kill each other  
Forget the media and its duplicity, fooling you and me  
Let's start again  
Let's start to talk without the fear of being hurt  
'Cause everybody's listening to everything and everybody  
Let's pull the cord, new blow  
Let's start again

Let's start again  
Before time is running down

Let's start again  
Let's start again  
Let's start again

Start again

Let's start again  
Let's start again  
Let's start again  
Let's start again
