

I need a cure I've got a fever
This medicine show's preaching a miracle
But it's all just smoke it's a fucked up joke
And I don't see the funny side
But I got a friend she's a believer

Jenni girl won't you come out and play
Save your tears for a rainy day
Take a deep breath and drift away
I think I'm going to drown if I stay in this town
Jenni let's go where the green grass grows
Pull me out of this god damn hole
I got lost in the tornado
I think I'm going to drown if I stay in this town, this town

I stumble around picking up pieces
Candles are lit in all of the windows
Baby sleep tight there's wolf inside
Little ghost town in the full moon light
A paradise for underachievers

Jenni girl won't you come out and play
Save your tears for a rainy day
Take a deep breath and we'll drift away
I think I'm going to drown if I stay in this town
Jenni let's go to the fields of gold
You're the pretty song but I'm the crow
We can take a walk down the yellow brick road
I think I'm going to drown if I stay in this town, this town
Just standing around this town

One two look at you pretty as a picture
Three four open my door sure am gonna miss ya
Hey ho your Daddy's on the phone go and set the table
Five six better make it quick she needs someone stable

Jenni girl won't you come out and play
Save your tears for a rainy day
Take a deep breath and we'll dive away
I think I'm going to drown if I stay in this town
Jenni girl that's the way it goes
We didn't get out but we sure got close
We can lie here watch your garden grow

Jenni girl won't you come out and play
Save your tears for a rainy day
Take a deep breath and drift away
I think I'm going to drown if I stay in this town
Jenni let's go where the green grass grows
Pull me out of this god damn hole
I got lost in the tornado
I think I'm going to drown if I stay in this town, this town
