

Go Steady

Sam Ryder

I hope this world rises to meet every dream
Inside your head
And I hope you'll always believe
If the sun should set
May you always know what you mean to me

Go steady
You can take your time
You're ready it'll all be fine
And whatever you face
There's a bond you can't break
I'll love you
And that'll never change
That'll never change

I've worn your shoes
I've been down the roads you will go
To distant stars
But when I was furthest from home
I realised
That all I ever wanted was you

Go steady
You can take your time
You're ready it'll all be fine
And whatever you face
There's a bond you can't break
I'll love you
And that'll never change

Change
That'll never change
That'll never change
Change

Go steady
You can take your time
You're ready it'll all be fine
And whatever you face
There's a bond you can't break
I'll love you
And that'll never change
That'll never change
That'll never change
That'll never change
That'll never
That'll never change
