

Human

Sam Tinnesz

We keep reaching up for the stars
While the sky is coming apart

Human human human

We feed the fire under our skin
Burn alive the garden we're in

Human human human

And it's already over
And it's already over

Ending just the way it began
Heaven slipping out of our hands

Human human human

And it's already over
And it's already over

Yeah it's already over
Yeah it's already over
