

# Keep You Warm

Sam Tsui

I'll keep you warm  
Underneath the Christmas lights  
Sing you through the silent nights  
Through the snow and through the storm  
I'll keep you warm

Winter's on the wind  
Sings familiar melodies  
Chill starts setting in  
Silver bells are casting spells  
It all comes back again  
Lay your troubles down  
Let me hold you

Now all the signs appear  
The Christmas trees, the memories  
They bring this time of year  
Ghosts of winters past  
Come in and whisper in your ear  
Don't listen to a word they've told you

I'll keep you warm  
Underneath the Christmas lights  
Sing you through the silent nights  
Through the snow and through the storm  
I'll keep you warm  
Start a fire and feel it glow  
As the winds begin to blow  
Come inside and close the door  
You don't have to face the cold alone no more  
I'll keep you warm

It's only you and me  
The world outside is frozen white  
I know it's hard to see  
I'll be your candle  
Be your light  
Be anything you need  
Star above the night to guide you

To find the highest bow  
Hang up your regrets and  
Let them fade into the sound  
The angel choirs and roaring fires  
Magic lost and found  
Love is all around  
Let it find you

I'll keep you warm  
Underneath the Christmas lights  
Sing you through the silent nights  
Through the snow and through the storm  
I'll keep you warm  
Start a fire and feel it glow  
As the winds begin to blow  
Come inside and close the door  
You don't have to face the cold alone no more

I'll keep you warm

Through the frightful weather  
I will hold you tight  
We'll stay warm together  
This December night  
Through the snow and through the storm  
I'll keep you warm.

As the winds begin to blow  
Come inside and close the door  
Now I know you've faced the cold alone before  
But you don't have to face the cold alone no more  
Because I'll keep you warm...
