## **Door of Celestial Peace**

First a dream Then comes life

And that's the way it goes with our thoughts That flow to meet up with life's extraordinary Number of possibilities From before the beginning we brought something along that Grows, that lives beside ourselves Beyond comprehension

Both sides, both banks And the river passes through Always two ways Meeting in the third path Spectrum, unexplored Giving understanding Far beyond our means

New house, new home A new zone to conquer Awaking, defending Conscious interests No rules, no laws For the heart's decision Awaiting, preparing Another revolution

Have you ever wondered what you really want When it all comes down, it comes down to this Have you ever wondered what you really want When it all comes down, it comes down to this...

Good times, hard times One creates the other To keep on, ride on Once started you'll get through Our needs, people's needs All longing for a crossing Picking, plucking The fruits of preservance

Well synchronized Well focused There's nothing we won't achieve Been trying Been searching A place located outside of this world

I close my eyes and waith for thee To bring me light of tomorrow's sun I call upon the unnamed To bring me sounds of tomorrow's song I've spent years in eternity With nothing 'round to hold on to I've entered the world of vacuity Where I wished to have something to wish for...

## Samael

Have you ever wondered what you really want When it all comes down, it comes down to this Have you ever wondered what you really want When it all comes down, it comes down to this
