I Surrender (To The Spirit Of The Night)

Samantha Fox

I''ve got a secret I can''t keep That burns inside when I''m in my sleep I try to hide from your memory But you come back & it''s haunting me

What will I find in this fantasy If I go with me now will you set me free

And I surrender to the spirit of the night I surrender (I surrender) The darkness is my lover And nights of pleasure So I surrender (I surrender) to the spirit of the night

I take cover from the light of day But you keep calling and I obey I don''t remember where I have been But you come back to me in my dreams

What will I find in this fantasy If I go with me now will you set me free

I surrender

I go crazy when the sun goes down And it takes control as I hit the town I give my body to the heat of the night And there''s no man judge if it''s wrong or right

Big city lights pouring down like rain
