

## You And Me

Samantha Fox

It's not a question of your sanity  
More of a lesson in humanity  
You knew the score  
You always wanted more  
Another lover you could choose to be  
A question mark about your sexuality

Surrounded by strangers  
And I never knew your face before  
And now I know it's you it's me  
What's it gonna be

It's you  
It's me  
What's it gonna be

A crime of passion is the price you pay  
A stolen moment is the only thing you gave  
You knew the score  
You always wanted more  
Within the boundaries of what you believe  
You'll find a truth and it will set you free

Surrounded by strangers  
And I never knew your face before  
And I know it's you it's me  
What's it gonna be

It's you  
It's me  
What's it gonna be
