

Send It Out To The Universe

Samantha James

When your life goes round in circles, feels lost in time
You keep searching for the answer, that you never find
You've been holding on for too long, letting life pass you by
Give it up surrender, let it go this time

Send it out to the universe
Let it fly away hey, hey, hey
Send it out to the universe
Whatever's meant to be will be

Send it out to the universe
Let it fly away hey, hey, hey
Send it out to the universe
Whatever's meant to be will be

Just have faith in things you can't see, open your heart
There's no better feeling than to be free, right where you are
Everything that you need, the world will provide
Listen hear your calling, it's louder than your own mind

Send it out to the universe
Let it fly away hey, hey, hey
Send it out to the universe
Whatever's meant to be will be

Send it out to the universe
Let it fly away hey, hey, hey
Send it out to the universe
Whatever's meant to be will be

When we trust in nature, on wisdom we fly
Just remember you're connected to the land and all lives
In the essence of our heartbeats, live old and wise
It's the truth within this kingdom, kingdom of the Most High

Send it out to the Universe
Send it out to the Universe
Send it out to the Universe

Send it out to the universe
Let it fly away hey, hey, hey
Send it out to the universe
Whatever's meant to be will be

Send it out to the universe
Let it fly away hey, hey, hey
Send it out to the universe
Whatever's meant to be will be
