

# Tonight

Samantha James

Tonight, tonight

If I ever dared to dream of a magic flight  
Let the stars so far away will burn so bright  
Ever thought I'd know what they meant by the pale moonlight

That's tonight, it's tonight  
It's tonight, it's tonight

If I ever thought the soul of a man could fly  
That I could feel one hundred more percent alive  
Ever wonder what the world in my hands would feel like

That's tonight, it's tonight

[Messertraum]

If I ever dared to dream of a magic night  
But the stars so far away will burn so bright  
Ever thought I'd knew what they meant by the pale moonlight

That's tonight, it's tonight

You know it's tonight  
You know it's tonight, yeah  
You know it's tonight, ooh  
You know it's tonight, yeah

You know it's tonight, yeah  
You know it's tonight, yeah  
You know it's tonight  
You know it's tonight, yeah, yeah
