

## Ode To Artifice

Samia

I synthesize my legs and eyes, my better side  
I made you just me, dignified  
Now I get to see you voguin' like I don't know how  
Could you side with me, confide in me and reside in me?  
Make it big and sign for me  
Get me into trouble, check me as I mumble  
Catch me as I stumble down

I know you will, honeybun  
Keep it together for both of us  
Maybe I can move like you  
I know I already do

You're fillin' me with jealousy, it's killin' me  
I give myself up willingly  
Just so you can take me back to where you hang around  
If I harden up, if I sharpen up, if I'm smart enough  
Then I'll know it in my heart enough  
To catch up with my double, check me as I mumble  
Catch me as I stumble down

I know you will, honeybun  
Keep it together for both of us  
Maybe I can move like you  
I know I already do

Honeybun  
Both of us  
Honeybun, ah

So when my banshee has a fit  
Dance me back into the script

I know you will, honeybun  
Keep it together for both of us  
Maybe I can move like you  
I know I already do

I know you will, honeybun  
Keep it together for both of us  
Maybe I can move like you  
I know I already do
