

All We Need Is An Island

Sammy Hagar

Well, all we need is an island
Big ol' sandy beach
Palm tree for some shade
Sweet sugar cane

All we need is an island (all we need is an island)
A hammock that swings
A tall cool one, a whole lotta sun
A belly full of rum

All we need is an island
Ooh, all we need is an island
All we need is an island

Get the cold ass winter gone
So cold and so long
Feel it in my bones
All we need is an island (all we need is an island)

A little time alone
A feeling in me, you and me
A little ecstasy
All we need is an island

Ooh, all we need is an island
(All we need is an island)
All we need is an island

Sea, sun, salt and sex
A line and a pole
Put a pig in a hole
All we need is an island

Work, work, work away
Honey, take me to this paradise
With a miracle kiss
All we need is an island

Ooh, all we need is an island
(All we need is an island)
All we need is an island

(All we need is an island)
Ooh, all we need is an island
(All we need is an island)
All we need is an island
