

## Daedalus (What We Have)

San Fermin

I saw it all  
Happened on the golden sheets  
In the morning  
You were asleep  
Hazy in your golden days

There was a child  
Moving on her mother's breast  
Breathing only  
Dust in the light  
But you know it's awfully hard  
To dream

I was a knight  
In my mother's arms  
Black as mourning  
Wearing the lights  
Glowing so my sister  
Could see

I felt it all  
But you know it's awfully hard  
To talk about it  
Try to recall  
The girls when I was seventeen-  
A dream

Know this can't be right  
But it's awfully hard to fight  
When it's going quickly and it's like  
We're half asleep  
There's no rosy almost days behind  
These painted lady eyes  
Let it go and all that they imply  
Get over me

I was afraid  
When I left my home  
And my mother  
Sadness, my friend  
She used to play for me  
And sing

Know this can't be right  
But it's awfully hard to fight  
When it's going quickly and it's like  
We're half asleep  
There's no rosy almost days behind  
These painted lady eyes  
Let it go and all that they imply  
Get over me

It's hard to talk about  
When inside you're freaking out  
When it's going quickly and you doubt  
You're anything  
But it's what we have instead of God

What we have instead of God  
What we have instead of God  
We're anything

But it's what we have instead of God  
What we have instead of God  
What we have instead of God  
We're anything

What we have instead of God  
Like the moment after love  
When we know we finally kill the buzz  
So we can sleep  
And we can finally let it lie  
While the days keep passing by  
Carried on the little deaths we die  
Then we can sleep

Where have you been?  
Wish I could talk to you  
I've been dreaming  
I don't wanna die  
Lying on the palest sheets  
In the morning  
I felt it all  
But you know it's awfully hard  
I don't wanna die  
Lying in my mother's bed  
In the morning
