No Devil

San Fermin

Wanted to be where the good girls go
Left and drove all night through the desert
Just to clear my mind on the open road
But the devil he was hanging around

Lay my head where the embers burn
Saw a sun touch down at the edge, at the edge
Should have stayed in the line to wait my turn
But the devil he was hanging around

Growing older on the same damn streets
Pace my paces on to the same beat
Gotta be some place that I can breathe
The air freezes my lungs

Oh I believe man I had potential
If I had got right
I could have been there, could have been special
In the white light

I'm having trouble, I'm not well
I got lost along the way
The devil dragged me straight to hell
No sleep no way you can't stay

I wanted to be where the trees don't grow
Drove the morning further than the roads go
Cut my ties and left my soul
Cause the devil he be dragging me down
Laid right down that brand new place
Miles and miles behind the cooler plains
They Keep my eye on the window pane
Cause the devil he'll be hunting me down

Oh I believe man I had potential
If I had got right
I could have been there, could have been special
In the white light

I'm having trouble, I'm not well
I got lost along the way
The devil dragged me straight to hell
No sleep no way you can't stay

How did I end up this far gone?
Or was it all me all along?
I wanna believe I am better than me
I'm no devil, I'm no devil
I'm no devil, I'm no devil!
I'm no devil!

I'm having trouble, I'm not well
I got lost along the way
The devil dragged me straight to hell
No sleep no way you can't stay

I'm having trouble, I'm not well

I got lost along the way
The devil dragged me straight to hell
No sleep no way you can't stay

I'm no devil, I'm no devil
I'm no devil, I'm no devil!
I'm no devil!
