

LIGHT ONLY

San Holo

Light, light, light, light...

Light only
Light only you could see
You know me endlessly
Eyes open wide

Shine on me
I feel forever free
You cut right through my cloudy skies

Light only
Light only you could see
Don't drift away from me

Some things are out of my control
Holding on hurts more than letting go
You are the highest high of all the lows
Holding on hurts more than letting go

Some things are out of my control
Some things are out of my control
Some things are out of my control
Some things are out of my control
Ooh
Some things are out of my control

Energy
It's never fading
It's only changing over time

Light only
Light only you could see
Don't drift away from me

Some things are out of my control
Holding on hurts more than letting go
You are the highest high of all the lows
Holding on hurts more than letting go

Some things are out of my control
Some things are out of my control
Some things are out of my control
Some things are out of my control

I am letting go

I am letting go
Some things are out of my control
I am letting go
Some things are out of my control
I am letting go
Some things are out of my control

I am letting go
