

NO PLACE IS TOO FAR

San Holo

Growing up, getting old, life's changing
Winter sun getting cold, still waiting
New day, new dawn, no patience
Still holding on

Blurred lines, low rise, new apartment
Cut ties, real life getting started
You left a weight where my heart is
It's getting heavy now

Your love is more than Nirvana
I feel it flowing like water
I'm falling deeper than oceans
I promise I'll never stop floating
No place, no time, no egos
There's only heaven between us
We're flying like superheroes

No place is too far with you
No place is too far with you
No place is too far with you
No place is too far with you

Spinning round in my head, tornado
Nothing left, no regrets, but I stay close
Hear you loud in my chest, you're my angel
You're my angel, yeah

Let me run away with you
Let me be where you are
Let me run away with you

Your love is more than Nirvana
I feel it flowing like water
I'm falling deeper than oceans
I promise I'll never stop floating
No place, no time, no egos
There's only heaven between us
We're flying like superheroes

No place is too far with you
No place is too far with you
No place is too far with you
No place is too far with you
No place is too far with you

Far with you
Far with you
No place is too far with you
