

Miracles

(Sandy) Alex G

I see great waves coming our way
Beautiful sunsets on lost and lonely days
Infinite futures become a single past
Everyone whimpers, nobody lasts

You say one day that we should have a baby
Right now baby I'm struggling, we'll see
You say one day that we should have a baby
God help me, I love you, I agree

After all
There's no way up from apathy
You and me
We got better pills than ecstasy
They're miracles and crosses
Miracles and crosses
Miracles and crosses

How many more songs am I supposed to write?
Before I should turn it off and say goodnight
How many more songs am I supposed to write?
Before I can turn it off and say goodnight

I have fears that I have not addressed
She says, some things from my past make me feel powerless
Baby, I pray for the children and the sinners and the animals t
oo
And I, I pray for you

After all
There's no way up from apathy
You and me
We got better pills than ecstasy
They're miracles and crosses
Miracles and crosses
