

## No Strings

Sara Bareilles

One night, they said, "No strings attached"  
But in that night, two souls were matched  
Goodbye was more than they could bear  
Then a wizard told them, it's always night somewhere  
So they chase the moon on an airplane powered by love

No strings, a lifetime in the sky  
Our love has wings, they never have to say goodbye  
Around the world a million times  
A morning that never came until the coroner said to the wizard  
"Time of death", the same

No strings, a lifetime in the sky  
On lover's wings, they never have to say goodbye
