

Love Sick

Sara Haze

Thought i needed you
but im a fool for letting my guard down
so tell me whats the trick
when loves a brick to keep from hitting the ground
cause inside
it wont die
infact it hurts like hell
I guess its no surprise
I'm high and dry
alone at the wishing well
where you cast your spell

leaving me love sick
with no short cure for the pain
im heart struck and ready to brake
when it hurts when its cold when the stars are all closed
I guess theyre telling me
im love sick
but theirs nothing left to say
and this time im turning away
make it fast, make it quick, your not easy to kill
you make me love sick

and though im feeling blue
im threw with you
and all of the things youve done
standing on the edge
and fighting bad
to find my place in the sun
and no matter what it takes
we'll find the way
to feel my way through the dark
I wont use my head
I always said its better to use my heart
even when the scares are leaving me

Love sick
with no short cure for the pain
im heart struck and ready to brake
when it hurts
when its cold
when the stars are all closed
I guess theyre telling me
im love sick
but theirs nothing left to say
and this time im turning away
make it fast, make it quick, your not easy to kill
you make me love sick

and I wanted so bad to believe
but some things arent ment to be
this is my second chance
cause im letting you go
and finding the strength to breath
this time
I'll find
that someone to call my own

won't be alone

love sick

with no short cure for the pain

I'm heart struck and ready to brake

when it hurts, when its cold, when the stars are all closed

i guess theyre telling me

I'm love sick

with no short cure for the pain

and this time im turning away

when it hurts, when its cold, when the stars are all closed

I guess theyre telling me

I'm love sick

but theirs nothing lefts to say

I'm heart struck and ready to brake

make it fast, make it quick, your not easy to kill

you make me love sick

yaaaa

you make me love sick

you make me love sick
